

Biotope tools for virus research

Biotope Oy offers a range of different tools that can be used to research the virus, see below.
Please contact us if you have any technical questions about our products or applications, www.biotope.fi

BIOLINE

SensiFAST™ Probe One-Step

SensiFAST™ Probe One-Step Kit has been developed for fast RT-qPCR and designed for superior sensitivity and specificity with probe-detection technology.

Bioline SensiFAST™ One-Step Kits (100 rxn/500 rxn)

SensiFAST™ Probe No-ROX One-Step Kit

SensiFAST™ Probe Hi-ROX One-Step Kit

SensiFAST™ Probe Lo-ROX One-Step Kit

**Validated
for detection
of SARS-CoV-2.
Please ask for
details.**

**Bioline products are produced under ISO 13485
and are suitable for further manufacturing use
as an IVD component.**

Mic is ready to help the world fight COVID-19

Mic qPCR Cycler

We have partnered with a number of diagnostic companies who have seen the benefits Mic provides to rapid and deployable diagnostics. It's with the help of these partners that we can offer a reliable platform to help in the fight against COVID-19.

Study and fight

Coronavirus

with research tools from PromoCell

To support the efforts of researchers worldwide to study, understand and combat this new health threat, PromoCell offers a range of high-quality antibodies specifically directed against components of the SARS-CoV-2 and the ACE2 receptor:

SARS Antibodies & Blocking Peptides

ACE Antibodies & Blocking Peptides

For every order, we donate to Baltic Sea protection.

MACHEREY-NAGEL

Viral purification products

Multiple labs have included MACHEREY-NAGEL's NucleoSpin and NucleoMag kits for isolation of viral RNA into their workflows, among them the two WHO reference laboratories, the Institut Pasteur Paris (France) and the National Institute of Health (Thailand).

www.mn-net.com>bioanalysis

NucleoSpin® RNA Virus (740956)

For reliable purification of viral RNA and DNA from cell-free biological fluids.

NucleoSpin® Dx Virus (CE-IVD) (740895)

Isolation of viral RNA and viral DNA from human plasma or serum samples - for *in-vitro* diagnostic purposes.

NucleoSpin® Virus (740983)

Reliable purification of viral RNA and DNA from cell-free biological fluids.

NucleoMag® Pathogen (744210)

The NucleoMag® Pathogen kit allows the purification of viral RNA and DNA and microbial DNA using magnetic beads.

NucleoMag® Virus (744800)

Magnetic-bead based isolation of viral RNA and DNA from serum or plasma for high throughput in 96-well format.

NucleoSpin® 8 / 96 Virus (740451)

Time saving parallel isolation of viral RNA / DNA from biological fluids in flexible 8-well strip format.

PROMOCELL

Microbial Detection, Elimination & Prevention

Products for effective prevention, detection and elimination of microbial – particular mycoplasma – contamination in laboratory including highly sensitive and user-friendly mycoplasma and bacteria test kits, reliable mycoplasma elimination reagents, as well as highly effective, user-friendly and safe surface disinfectants and water stabilizers.

Waterbath Stabilizers

CODE	PRODUCT	QTY	PRICE
PK-CC01-867-1B	Aquaguard-1 (Incubator)	100 ml	29€
PK-CC01-867-3B	Aquaguard-1 (Incubator)	3 x 100 ml	78€
PK-CC01-867-10B	Aquaguard-1 (Incubator)	10 x 100 ml	255€
PK-CC01-916-500	Aquaguard-2 (Water bath)	500 ml	79€

Disinfectants

PK-CC91-5053	Spore-EX Spray*	750 ml	98€
PK-CC91-5053-10	Spore-EX Spray*	10 x 750 ml	796€
PK-CC91-5053-W120	Spore-EX Wipes*	120 pieces	116€
PK-CC91-5051	Mycoplasma-ExS Spray	500 ml	48€

PCR Mycoplasma Test Kits

PK-CA91-1024	PCR Mycoplasma Test Kit I/C	24 tests	348€
PK-CA91-1048	PCR Mycoplasma Test Kit I/C	48 tests	507€
PK-CA91-1096	PCR Mycoplasma Test Kit I/C	96 tests	827€

* Spore-EX has been tested to **ELIMINATE CORONAVIRUS** at a contact time of 1 minute (validated according to EN14476).
