

jetOPTIMUS[®]

Best-in-class DNA transfection reagent

HIGHLY EFFICIENT. Maximal gene expression in hard-to-transfect cells.

COST-EFFECTIVE. Use minimum reagent volume and DNA quantity.

BIOLOGICALLY RELEVANT. Keep an excellent cell viability & morphology.

TIME-SAVING. Transfect with an optimized ready-to-use protocol.

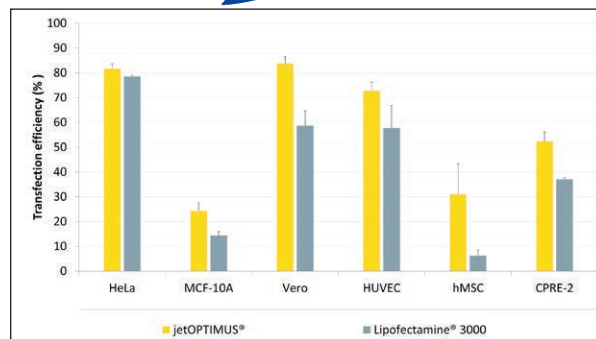

PROMOTION! 20% OFF

| Product | Code | Size | Price | PROMO |
|-------------------------|--------|----------------------------|-------|-------|
| jetOPTIMUS [®] | 117-07 | 0.75 ml. 2x60 ml Buffer | 48+€ | 385€ |

NOTE! 0,75 ml of jetOPTIMUS[®] is sufficient for 1500 transfections in 24-well plates or 375 transfections in 6-well plates following the standard protocol.

This promotion is valid only through **Biotop Oy/City-Lab Oy** from the 1.9.2021 until the 30.11.2021.

CUSTOMER COMMENT:
"There is a massive improvement with the jetOPTIMUS[®] compared with gold standard Lipofectamine with HUVECs. Something like 30% more transfected cells, no mortality."

Highly efficient: jetOPTIMUS[®] outperforms its main competitor. Transfections were performed on several cell lines following standard protocol.
